

**NTE Energy Canada Ltd.** produces oil and natural gas in Alberta and BC. NTE Energy Canada Ltd. strives to advance production optimization, new production opportunities on existing lands, and is looking to grow through acquisitions. While looking to future opportunities, the company will actively manage its resource liabilities in a responsible manner to meet regulatory requirements, and pursue carbon emission reductions. NTE Energy Canada Ltd. is based in Calgary, Alberta. We have grown to over 50 employees and are located throughout Alberta and BC.

We are currently recruiting for a **Field Operator** in Fort Nelson. Reporting to the Area Coordinator, this role provides the opportunity to be involved in a full range of responsibilities including the following:

**Responsibilities:**

- Maintain field production using the following skills and experience including well optimization, pigging optimization and maximizing facility run time and efficiency.
- Responsible for keeping equipment and facilities operating at maximum efficiency with minimum down town in a safe and cost effective manner.
- Identify and follow through on optimization opportunities.
- Assist in planning and execution of field and facility projects.
- Provide input and support on facility optimization and gathering system modification projects.
- Assist in planning and execution of field and facility projects.
- Ensure prompt and accurate reporting of production/fuel/flaring/venting data (including trucked volumes).
- Work effectively with Production Accounting staff to ensure accuracy in PVR and provide accurate information about flow and meter questions and issues as they may arise.
- Ensure all regulatory requirements are being met and documented.
- Maintain continuous understanding of operating costs and key cost drivers and support cost saving initiatives.
- Assist in ordering and tracking parts and fittings.
- Monitor and approve invoicing through Open Invoice to ensure accuracy and prompt payment to vendors.
- Liaise with service providers and provide support to maintenance crews as needed.
- Order and track parts and fittings for projects and code and approve invoices.
- Other duties as assigned.

## **Qualifications:**

- Knowledge of plant processes including compression, refrigeration and stabilization.
- Previous experience in production operations.
- Amine process knowledge and experience an asset.
- Thorough knowledge of gathering system and isolation points.
- Thorough working knowledge of all plant and field equipment and its functions.
- Knowledge of regulatory requirements.
- Positive attitude and strong sense of team environment.
- Above average decision making skills.
- Strong communication skills.
- Strong organizational skills.
- Positive attitude and the ability to be open minded.
- Valid Class 5 Driver's License.
- Good computer skills.
- Familiar with excel and word programs.
- Familiar with Open Invoice an asset
- Ability to lift 50 lbs, able to climb a 6ft ladder and able to assemble/disassemble parts with both hands.

This is a camp based position and works 15 days on followed by 13 days off.

If you are interested in this career opportunity, please submit a cover letter and resume to [lyle.veillet@nt-energy.ca](mailto:lyle.veillet@nt-energy.ca). Please include the job title in the subject heading.

The position will remain open until a suitable candidate is found.

*NTE Energy Canada thanks all applicants for their interest but only candidates chosen for an interview will be contacted.*
